FIG. 4

FIG. 3

FIG. 5 is a cross-sectional view of a container assembly. The assembly includes a container body (25) with a lid (21) and a tapered plug (19) inserted into a neck (18). Various components are labeled with reference numerals: 4, 26, 27, 35, 44, 60, 61, 63, 65, 66, 67, 68, 69, 70, 71, 75, 76, 77, 80, 81, 85, 86, 90, 91, 92, 94, 95, 96, and 99. A dashed line 33 indicates a cross-section.

FIG. 7

Figure 9 is a cross-sectional view of a multi-layered structure 201. The structure is composed of several layers and components, including a top layer 225, a middle layer 227, and a bottom layer 226. A central core 233 is shown, surrounded by a layer 235. The structure is further defined by layers 204, 261, 263, 267, 277, 275, 276, 268, 281, 269, 270, 280, 285, 296, 401, 422, 266, 219, 218, 239, 271, 270, 285, 269, 281, 277, 275, 276, 265, 267, and 268. A dashed line 233 indicates a central axis or interface. The structure is shown in a cross-section, revealing its internal layers and components.

FIG. 10

FIG. 16

FIG. 11

A cross-sectional view of a mesh structure 500. The structure consists of a top layer 227 and a bottom layer 225. A mesh layer 226 is positioned between the top and bottom layers. A specific mesh element 235 is highlighted within the mesh layer 226.

FIG. 13

FIG. 14 is a top view of a circular component, such as a lens or a mirror, showing concentric rings and a central feature. The component is labeled with various reference numerals: 224, 399, 440, 450, 455, and 422. The central feature is a small circle with a dot in the middle, labeled 422. The concentric rings are labeled 440, 450, and 455. The outermost ring is labeled 224, and the innermost ring is labeled 399. The central feature is also labeled 285.
